

1 JANUARY—1 MARCH 2014

Increased Sales and Improved Operating Profit

- Net sales rose by 6% to 346.1 MSEK (327.7).
- Operating profit increased by 6% to 26.2 MSEK (24.7).
- Profit after tax amounted to 15.1 MSEK (16.8).
- Earnings per share were SEK 0.79 (0.82).
- New reporting structure means that Automation and HMI Products are merged into the Industrial Automation Solutions (IAS) business area.

Interim Report Beijer Electronics AB

Comments from Fredrik Jönsson, CEO

“The first quarter of 2014 confirmed the cautiously positive trend in the second half of 2013, with increased sales and improved operating profit in the quarter. Order intake remained unchanged in the period, for reasons including non-recurring effects. At the same time, progress shows that the recovery is slow and that uncertainty remains on some markets and in certain segments.

Group sales also varied across different markets. While the US made brisk progress, sales in the Nordics declined. The rest of Europe and Asia returned positive growth overall.

The IDC business area continued to make convincing progress in terms of order intake, sales and operating profit. IDC continues its global success in the rail segment, receiving major orders from China, Poland and Finland. Network Solutions won several large orders on key European markets.

While Train and Network Solutions are continuing to make extensive investments in product development, Beijer Electronics has also established a Wireless development center in Taiwan to meet growing demand for wireless communication solutions.

As previously announced, Beijer Electronics started presenting its reporting in two business areas, Industrial Automation Solutions (IAS) and Industrial Data Communication (IDC), from Q1, 2014 onwards.

IDC comprises Westermo and Korenix, which focus on the market for industrial data communication. IAS comprises the former business areas HMI Products and Automation, and address the industrial automation market. No internal reorganization has taken place, and the changes serve to increase the transparency of operations.

The IAS business area made mixed progress in the first quarter. Sales increased and order intake fell, while operating profit was somewhat lower. The US and China made positive progress. The Nordics and the rest of Europe were more hesitant as a result of factors including planned inventory reductions by some of its major customers.

On the whole, we consider that the underlying market is gradually stabilizing. If the trend continues, there are grounds for a degree of optimism for the full year 2014.”

Market and Surrounding World

Demand on the global industrial automation market continued to stabilize in the first quarter. Geographical differences in terms of growth rate continued to characterize the market. The US market returned solid growth. In Europe, the picture remained fragmented, with good demand on some markets and slowing demand on others. Asia has experienced some recovery, particularly China.

Business Area Sales and Operating Profit

MSEK	Sales Quarter 1		Operating Profit Quarter 1	
	1403	1303	1403	1303
IAS business area	240.2	237.3	19.2	20.3
IDC business area	107.3	91.4	13.2	8.1
Intra-group sales	-1.4	-1.0		
Group adjustments and depreciation			-6.2	-3.7
Beijer Electronics Group	346.1	327.7	26.2	24.7

Changed Reporting Structure

Beijer Electronics has introduced a new reporting structure which means that three business areas are now reported as two—Industrial Automation Solutions (IAS) and Industrial Data Communication (IDC). The IAS business area comprises the two former business areas Automation and HMI Products. The revision results from the changes introduced in connection with the buy-back of Mitsubishi Electric’s former 15% stake in Automation. With its significantly extended product range launched in autumn 2013, IAS can now focus on the global market.

As previously, IDC comprises Westermo and Korenix, and serves the global data communications market.

Figures from previous years have been restated to correspond with the new reporting format.

The Group in the First Quarter

The group’s order intake remained largely unchanged compared to the corresponding period of 2013, totaling 354.7 MSEK (357.3).

Group sales rose by 6% to 346.1 MSEK (327.7).

IDC provided most of the sales increase, while IAS made slight progress. Group sales in the Nordics fell by 7%, while climbing by 10% in the rest of Europe. Sales made strong progress in the US, rising by 34%. In Asia, sales grew by 16%.

Group operating profit before depreciation and amortization increased by 8% to 42.9 MSEK (39.8), corresponding to a margin of 12.4% (12.1). Depreciation and amortization were SEK 16.7 MSEK (15.1). Operating profit increased by 6% to 26.2 MSEK (24.7), corresponding to an operating margin of 7.6% (7.5). The profit improvement is due to higher sales volumes and slightly stronger gross margins. Total development expenses were 27.7 MSEK (26.6), comprising 8.0% (8.1) of group sales.

Profit before tax was 20.7 MSEK (23.5). Net financial items were -5.5 MSEK (-1.2). The decline on the previous year was due to a positive outcome on earn-out payment and high financial currency gains in 2013. Profit after estimated tax was 15.1 MSEK (16.8). Earnings per share after estimated tax were SEK 0.79 (0.82).

Group Sales

▲ The bars and left-hand scale indicate quarterly sales. The curve and right-hand scale show rolling four quarter sales.

Group Operating Profit

▲ The bars and left-hand scale indicate quarterly profit after depreciation. The curve and right-hand scale show rolling four quarter profit after depreciation.

Industrial Automation Solutions Business Area

The Industrial Automation Solutions (IAS) business area largely progressed as expected in the first quarter. Underlying business was relatively stable while order intake was affected by inventory reductions by collaboration partners together with a changeover from rolling to annualized orders by some customers. The US and China made positive progress, while sales in the Nordics and the rest of Europe fell. The integration of acquired Turkish company Petek progressed according to plan.

Business area orders fell to 236.6 MSEK (259.2). Sales were 240.2 MSEK (237.3). Operating profit before depreciation and amortization was 26.6 MSEK (26.9), corresponding to a margin of 11.1% (11.3). Depreciation and amortization was 7.4 MSEK (6.6). Operating profit was 19.2 MSEK (20.3), corresponding to an operating margin of 8.0% (8.6).

Sales, IAS

▲ The bars and left-hand scale indicate quarterly sales. The curve and right-hand scale show rolling four quarter sales.

Sales by Geographical Market, IAS

▲ Sales by geographical market for the first quarter 2014 compared to 2013.

Industrial Data Communication Business Area

The Industrial Data Communication (IDC) business area made very positive progress, with a strong increase in order intake and sales and a significant improvement in profit.

The advances are the result of previous years' goal-oriented investments in product development and market initiatives. Underlying business operations made favorable progress with increased sales in the quarter. The Train segment continued to return brisk growth. Westermo IP Train is continuing its global success with major orders received from China, Poland and Finland in the quarter. Network Solutions progressed as expected, with a number of major orders received from key markets in Europe. Order intake

increased sharply in Asia. Overall, this implies that the business area's order book is now its strongest ever.

IDC's order intake grew by 20% to 118.0 MSEK (98.1). Sales increased by 17% to 107.3 MSEK (91.4). Operating profit before depreciation and amortization increased by 38% to 20.0 MSEK (14.5), corresponding to a margin of 18.6% (15.8). Depreciation and amortization was 6.8 MSEK (6.3). Operating profit increased by 62% to 13.2 MSEK (8.1), corresponding to an operating margin of 12.3% (8.9). The profit improvement is largely due to higher sales volumes and an improved gross margin.

Sales, IDC

▲ The bars and left-hand scale indicate quarterly sales. The curve and right-hand scale show rolling four quarter sales.

Sales by Geographical Market, IDC

▲ Sales by geographical market for the first quarter 2014 compared to 2013.

Other Financial Information

Group investments including capitalized development expenses and acquisitions amounted to 23.4 MSEK (17.3). Cash flow from operating activities was -14.7 MSEK (38.1). Equity was 402.2 MSEK (386.5) on March 31, 2014. The equity ratio was 29.1% (29.1). Cash and cash equivalents was 107.5 MSEK (127.7). Net debt was 585.2 MSEK (560.3). The average number of employees was 789 (745).

Prospects for 2014

Beijer Electronics generated increased sales and improved operating profit in the first quarter 2014. Although the surrounding world remains characterized by significant uncertainty, the market stabilization seen in recent quarters gives cause for cautious optimism for the full year 2014.

Redovisningsprinciper

For the group, this Interim Report has been prepared in accordance with IAS 34 Interim Financial Reporting and applicable regulations of the Swedish Annual Accounts Act. The Interim Report for the parent company has been

prepared in accordance with the Swedish Annual Accounts Act's chapter 9, Interim Reporting. The accounting principles applied for the group and parent company are consistent with those accounting principles used when preparing the latest annual accounts.

This Report has not been reviewed by the company's Auditors.

Ny iX T7AM operatörspanel för marint bruk

Operatörspanelen iX T7AM är godkänd av alla större klassningssällskap och är färdigt taget alla system ombord. Den ger operatören snabb information och intuitiv funktionalitet där den är lätt att använda. Panelen är robust och har en skärm med hög upplösning. Den svarta ramen och den omfattande funktionaliteten gör iX T7AM perfekt för både stora och medelstora applikationer.
